Drug Education for Teens Series/Hallucinogens, v. 5 (cc)

Mind-altering drugs known as hallucinogens are powerful substances that can bring about changes in perception that may last for hours, days or, in the worst cases, forever. *Hallucinogens* takes an in-depth look at the history of drugs such as LSD and points out a frightening link between drug use and mental illness. Interviews with former users and experts allow students to see how dangerous 'tripping' can be, affecting the lives of not only drug users but everyone around them.

Drugs: Uses and Abuses Series/Psychedelics & Hallucinogens, v. 4

Used at '60s rock music festivals and '90s all-night underground dance parties, drugs like LSD and Ecstasy have a dangerous fascination for young adults. In this program, a pharmacist, an addiction counselor, a police officer, a historian, a pastor, and recovering addicts provide background on psychedelics and hallucinogens as a class of drugs and study the history and biological effects of mescaline, psilocybin, LSD, and the designer drug MDMA. Utilizing case studies and personal experience, they explore these drugs' use, abuse, and hazards, which include vivid flashbacks and critical serotonin depletion.

The Truth About Hallucinogens (cc)

Hallucinogens are making a comeback among today's young people. Viewers of this fast-paced, information-packed video will learn the dangers of illicit drugs like LSD, Ecstasy (MDMA), PCP (angel dust), peyote, mescaline, and mushrooms. Live-action video footage allows students to hear from young people who have faced grave consequences after experimenting with what they assumed were "natural" substances. *Hallucinogens: The Facts* uncovers many of the misconceptions that teens may have about hallucinogens. Not only are these substances illegal to buy, sell or possess, they are also extremely harmful and potentially addictive. Video reveals the long-lasting and debilitating effects to the brain, central nervous system and other body systems. After viewing this video and completing the student activity sheets in the Teacher's Resource Book, your students will be armed with important information about the dangers of these popular drugs, and will be much less likely to experiment with hallucinogens.
