Idaho Community Initiative on Advance Care Planning (ICIACP)

In December of 2013, the Idaho Community Initiative on Advance Care Planning (ICIACP) was formed with a single goal:

*To engage stakeholders across Idaho to determine feasibility for developing a collaborative and systematic approach to Advance Care Planning (ACP) across the Treasure Valley.*

This grass roots initiative also expresses a broader goal to implement a state-wide initiative once a successful pilot program has been established. Thanks in-part to the efforts and hard work of the ICIACP Steering Committee members that goal is now closer to being realized.

**2014 ICIACP Steering Committee Members:**

Rick Bassett, MSN, President, Idaho Quality of Life Coalition, bassettr@slhs.org
