St. Luke’s- Children Injury Prevention
Nathan Diehl
Supervisor: Sherry Iverson and Alissa McKinley

Competencies:
• **Assessing**- During each event St. Luke’s worked to identify the target population and what would be the best fit for information to promote.
• **Plan**- To create a game or activity for children so that learning was hands on. There were also prizes given away for take home reinforcement.
• **Implementation**- Because of the nature of this internship we had weekly events going. Implementation went quickly.
• **Evaluation**- Because we had so many events, evaluations were looking for did we have a conversation with a child and were they exited to take home a prize.

Take Away
• The piece of this internship I found very valuable that was different from previous internships, is that sometimes you don’t have one end goal. You have a week long project and that be ready to start again.
