**Immunization/Health Requirements**

The following check list may be used to assist in the collection and submission of immunization and/or health records to the Department of Respiratory Care. Documentation of immunity is **due one week before the class start date in August**. Students who have not submitted documentation may **not** attend clinical. Absences from clinical may negatively impact grades.

**Note:** Laboratory evidence of immunity is a titer which requires a blood draw.

- **Measles/Rubeolla:** Documented administration of two doses of live measles virus vaccine *or* Laboratory evidence of immunity (quantitative)
- **Rubella:** Documented administration of two doses of live rubella virus vaccine *or* Laboratory evidence of immunity (quantitative)
- **Mumps:** Documented administration of two doses of live mumps virus vaccine *or* Laboratory evidence of immunity (quantitative).
- **Varicella/Chicken Pox:** Documented administration of two doses of varicella vaccine *or* laboratory evidence of immunity. Verification may also be given via physician records showing the date the student had the chicken pox.
- **Tdap:** Documented administration of Tdap vaccination (tetanus, diphtheria and pertussis) with a booster if the Tdap vaccination was given prior to 7 years ago.
- **Influenza:** Documented administration of annual influenza vaccination.
- **TB skin testing (TST):** Documentation of negative T.B. Skin test within the last year. A positive TB test requires a CXR, medical evaluation, and LIP written release for patient care. This test is required annually.
- **Hepatitis B:** Students are required to take the series of three Hepatitis B vaccinations. Documentation would include administration of 3 doses of hepatitis B vaccine *or* Laboratory evidence of immunity (quantitative).
